

Press Release

Frankfurt am Main, Germany, October 28th, 2020

Dorsch Gruppe takes over Majority of Business Activities of Spiekermann

- Dorsch Gruppe takes over the majority of employees and projects of Spiekermann GmbH Consulting Engineers
- Spiekermann is a renowned German engineering firm in the fields of mobility, environment, water and civil engineering
- The acquisition strengthens the regional presence of Dorsch Gruppe in Germany and complements the multidisciplinary service portfolio of both companies

With effect from November 1, 2020, Dorsch Gruppe will take over the majority of the employees and projects of Spiekermann GmbH Consulting Engineers through an asset deal. Spiekermann GmbH Consulting Engineers is based in Düsseldorf and has offices in Berlin and Dresden. This strategically important step is complementing the multidisciplinary service spectrum of both companies and creates sustainable synergies. The well-established Spiekermann brand name will be continued.

The range of services offered by Spiekermann with a staff of around 150 employees covers the multidisciplinary fields of mobility, environment, water and civil engineering. Founded in 1968, the company holds an outstanding position in the German engineering market with excellent references and a very high rate of customer satisfaction.

"By combining decades of experience as well as the professional expertise of Spiekermann and Dorsch, we are strengthening the market position of both companies in the important German market in a sustainable way, at the regional, professional and operational level", explains Andreas Schweinar, CEO of Dorsch Gruppe.

For almost 70 years, Dorsch has been a reputable consulting and engineering partner for clients from industry, private investors and public institutions. With around 2,000 employees Dorsch Gruppe ranges among Germany's biggest independent planning and consulting enterprises. Dorsch is represented internationally through 10 branch offices and numerous project offices in more than 40 countries. The portfolio of services comprises airports, transport and infrastructure, water and environment, building and urban planning, oil and gas, development cooperation as well as asset management.
